GRACEFUL DIVINE MELTS

Your storefront is ready.

A complete walk-through of what has been built for you, and how to run it yourself in Shopify.

A NOTE FOR YOU

Hi Tamara,

Your new Graceful Divine Melts Shopify storefront has now been completed and prepared for customers.

The website includes:

- A fully responsive design for mobile, tablet and desktop
- Complete navigation with the Shop dropdown and working page links
- Product collections, product pages, quick-add functionality and Shopify checkout
- Your bundle deal and all existing product options
- A custom scent request experience that records the requested fragrance against the customer's order
- A scent discovery page to help customers choose a fragrance
- About, Contact, FAQ, Delivery & Returns, Wax Melt Care & Safety, Privacy and legal pages
- Customer account access and order history
- Shopify's cookie and privacy preference controls
- Social media, review, contact and legal links organised within the footer
- Correct Graceful Divine Melts branding throughout the storefront and checkout journey
- A welcome offer popup for 10% off the customer's first order

When a customer joins through the welcome offer, their email is securely captured inside Shopify with marketing consent. They can then be found and managed through the Shopify Customers area for future email campaigns, product launches and restock announcements.

The welcome discount is only revealed after a successful signup, and the form includes email validation and privacy messaging.

The important storefront content remains manageable through Shopify. This includes products, product photos, prices, stock, banners, announcement messages, popup wording and timing, homepage sections, navigation, page content, social links and footer information.

The storefront has also been optimised to reduce unnecessary image loading and improve general responsiveness.

Your existing product photography has been preserved exactly as supplied: most products currently have one image, while the Mixed Scent Package has three. Additional photographs can be added to any product later through Shopify.

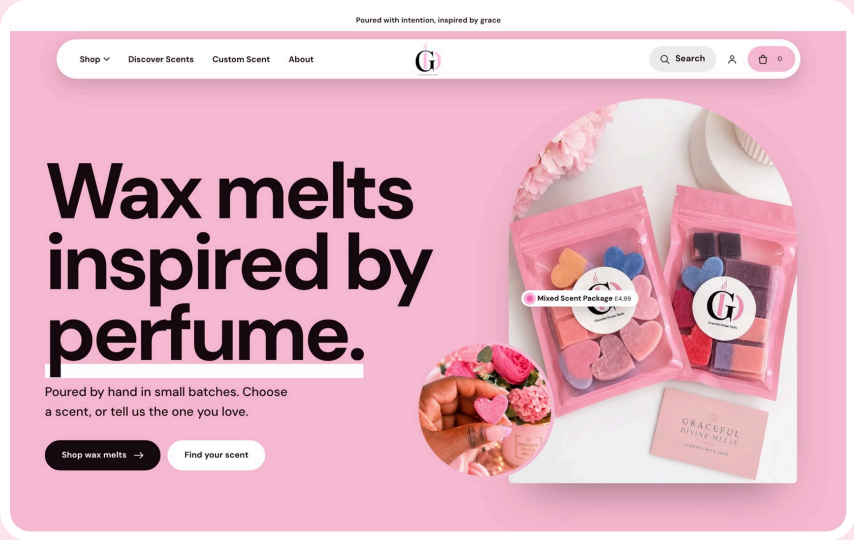

The website is now ready for customer use. The only optional future step would be setting up automated marketing campaigns through Shopify Email; customer email collection already works without this.

OneSimpleSite

HOMEPAGE AND NAVIGATION

Beautiful on every screen.

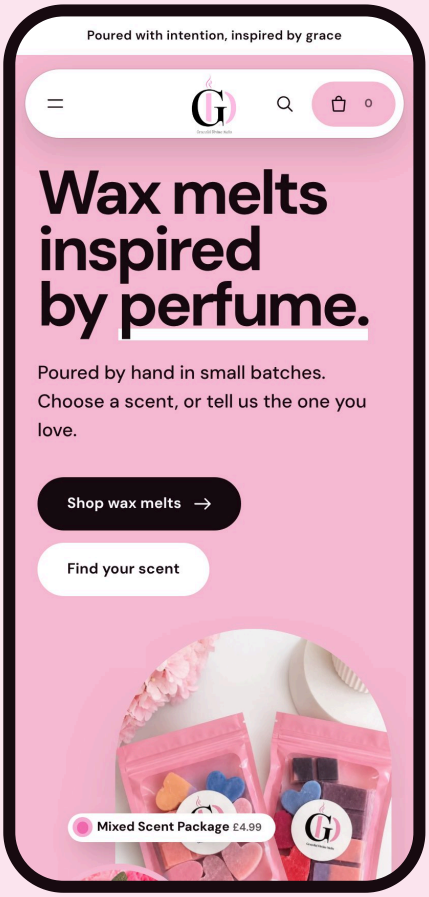

A floating navigation with a Shop dropdown, a rolling announcement bar, your best-seller up front, then scents, moods, custom requests, your bundle, your story, Instagram and TikTok, and quick answers.

Desktop. Hero, navigation and announcement bar.

Discover by mood. Floral, Sweet and Woody, each with its own scents.

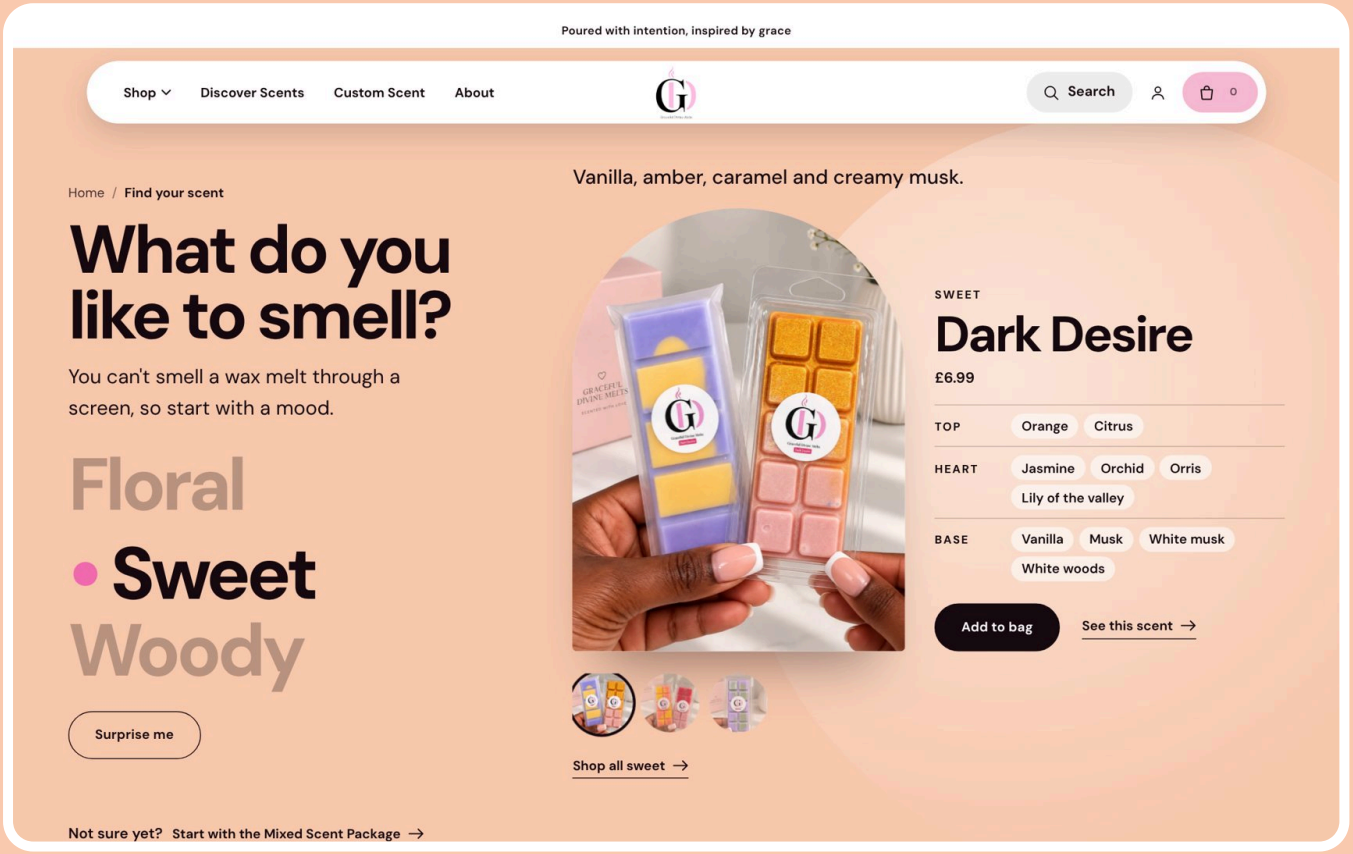

Mobile. Built phone-first, with a compact navigation and large tap targets.

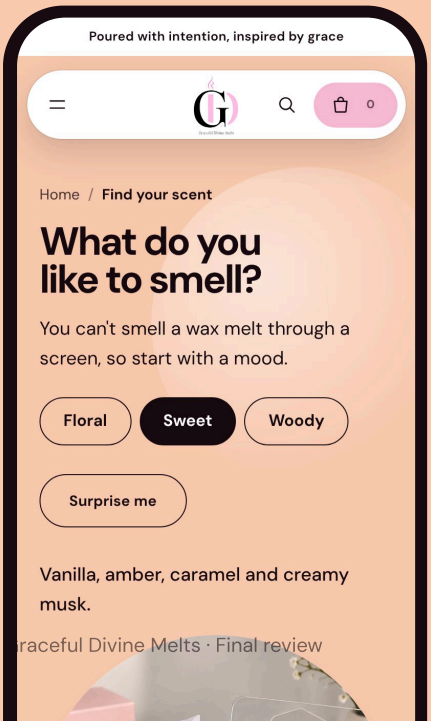

CHOOSING A SCENT

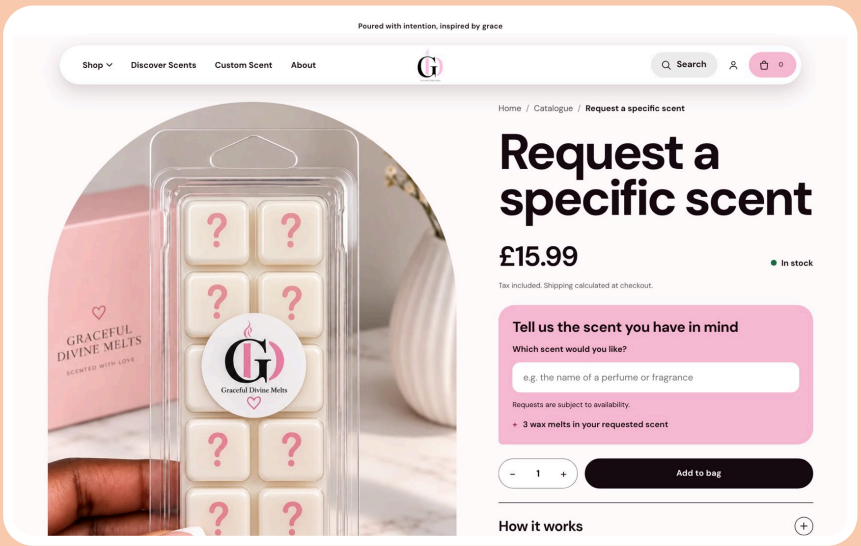

Choose a mood. The whole screen changes.

The scent discovery page lets customers pick a mood, browse that mood's real scents with their top, heart and base notes, and add to bag. "Surprise me" picks one at random.

Find your scent, desktop.

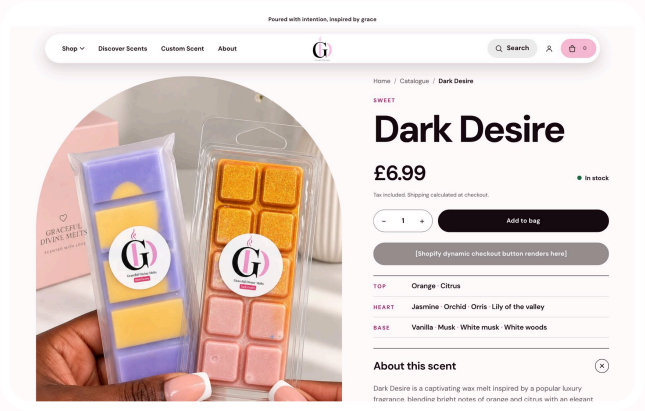

Custom scent requests. The customer names the perfume they love, and it is recorded against their order so you can see exactly what was asked for.

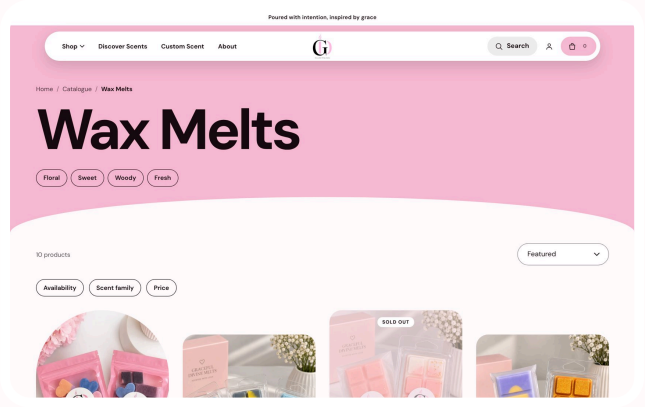

SHOPPING

From browsing to Shopify checkout.

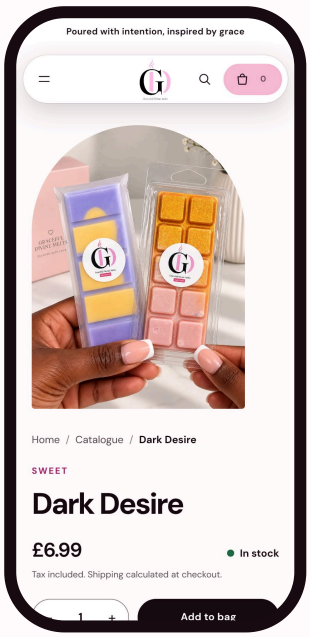

Collections, product pages, quick add, your bundle deal and every existing option, with search that suggests scents as customers type.

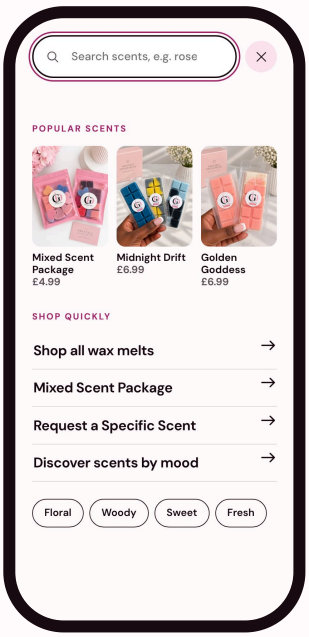

Product page. Photos, price, stock, quantity and scent notes.

Collection. Filters, sorting and quick add.

Product, phone.

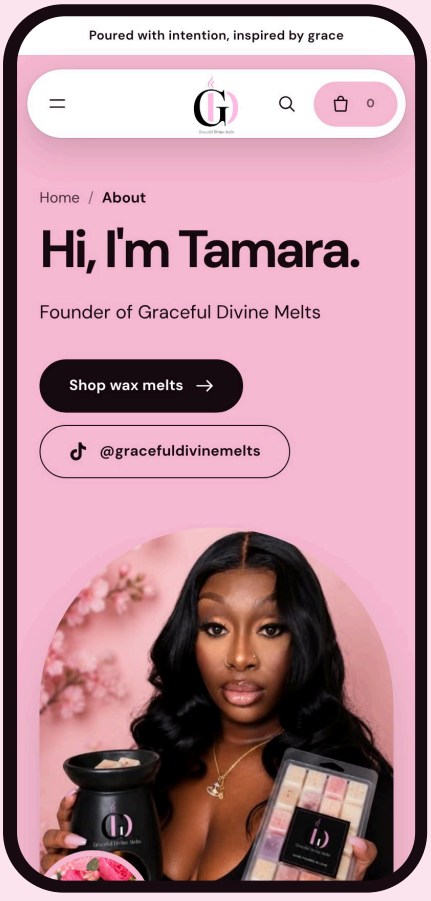

Search. Popular scents first.

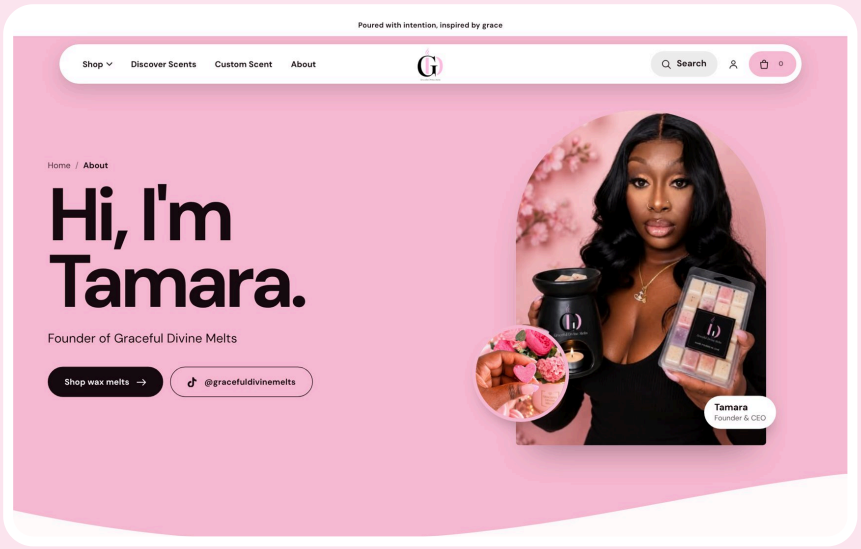

YOUR STORY

A face and a voice customers can trust.

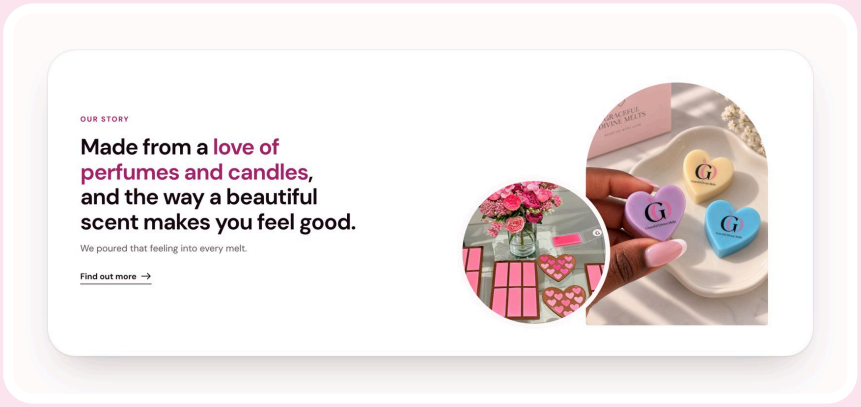

The About page introduces you in your own words, and a short Our story card on the homepage leads there.

About, phone.

About page.

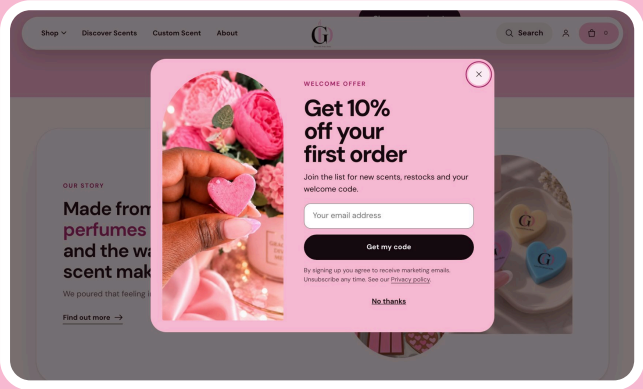

Our story. On the homepage, with a link to find out more.

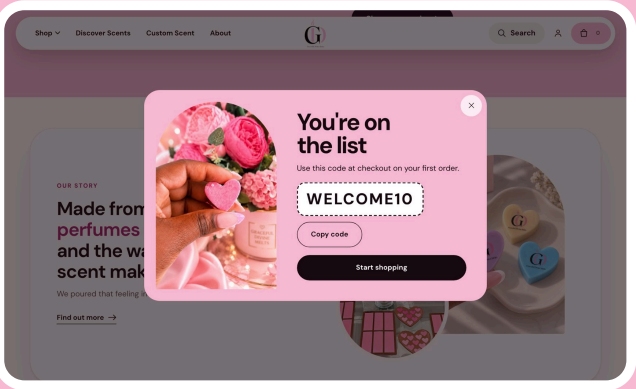

WELCOME OFFER

10% off a first order, and a growing email list.

After a short delay, or once a visitor has scrolled partway, a welcome offer appears. It asks for an email address, checks it, and only then reveals the discount code.

1. The offer. Email box, privacy message and a clear "No thanks".

2. After signing up. The code appears with a Copy button.

What happens to the email

It is stored securely in Shopify with marketing consent. Find everyone under **Customers** (they carry the tags **newsletter** and **welcome-offer**) for campaigns, launches and restock news.

Fully editable

Wording, the code, the picture, colours, timing and phone on or off, all in the Shopify theme editor under **Welcome offer popup**.

RUNNING IT YOURSELF

Where to change things.

Everything you will want to change lives in Shopify. No code, no extra apps.

I WANT TO CHANGE…	GO TO…
Products, photos, prices, stock	Products
Homepage sections, banners, announcement messages	Online Store > Themes > Customise (homepage)
The welcome offer wording, code, timing	Customise > footer area > Welcome offer popup
Page wording (About, FAQ, Care, Delivery)	Customise > open that page
Menus and links	Content > Menus
Social links, contact details, footer information	Customise > Theme settings
Scent family and notes on a product	The product page, Metafields section
The discount code	Discounts
People who joined the list	Customers
Messages from the Contact form	Your store email inbox
Legal policies	Settings > Policies

Adding a new scent

Add the product as normal, then fill in its scent family and top, heart and base notes. It then appears automatically in Find your scent, Discover by mood and the collection filters.

WHAT'S NEXT

You're ready for customers.

1. **Place a test order**
   Do one order yourself start to finish, then cancel it, so you have seen what customers and you see.

2. **Share the new look**
   Post the new site on Instagram and TikTok. Your links are already in the footer and the homepage row.

3. **Watch the welcome offer**
   Check Customers after a few days to see who has joined.

4. **Optional: email campaigns**
   When you are ready, set up automated campaigns in Shopify Email. Collecting emails already works without it.

5. **Need something bigger?**
   Smaller edits you can do yourself in Shopify. For anything major, such as new page layouts or new features, get in touch and we will quote for it.
