GRACEFUL DIVINE MELTS

Your new website.

A custom-designed Shopify website for perfume-inspired wax melts, built to feel like the brand and to make choosing a scent easy.

Designed and built by OneSimpleSite

THE SHORT VERSION

Beautiful on every screen. Simple to run.

Your shop keeps everything it already has: products, prices, orders and customers. The new design simply sits on top of your existing Shopify store.

£380

one-off for the full website, transferred into your existing Shopify

You

can edit text, images, products and the welcome offer yourself in Shopify

0

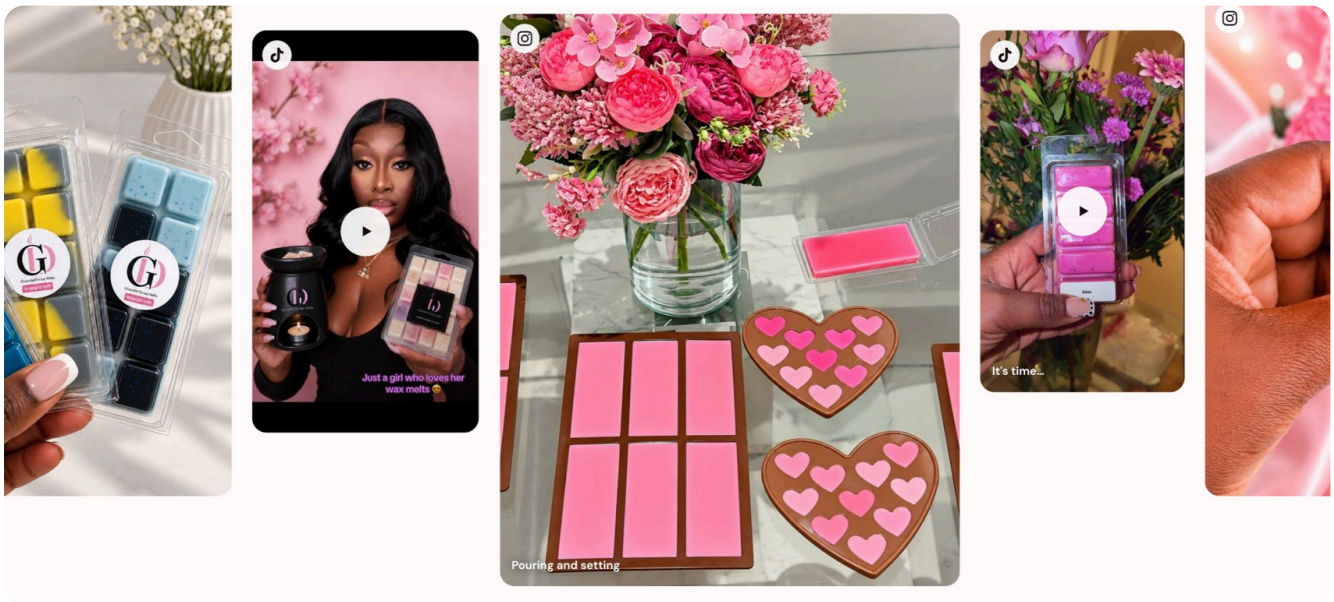

extra apps or monthly fees needed for the theme itself

Made for your customers

- **Find your scent**, a guided, full-screen way to choose by mood.
- **Custom scent requests** built into the order, so nothing gets lost.
- **Search** that suggests scents as people type.
- **Instagram and TikTok** shown right on the homepage.

Made for you

- **Edit it yourself** in the normal Shopify editor: text, images, colours and sections.
- **Your payments** appear automatically from your Shopify settings.
- **Nothing invented.** Only your real products, photos and words.
- **Fast and accessible** on phones, tablets and desktop.

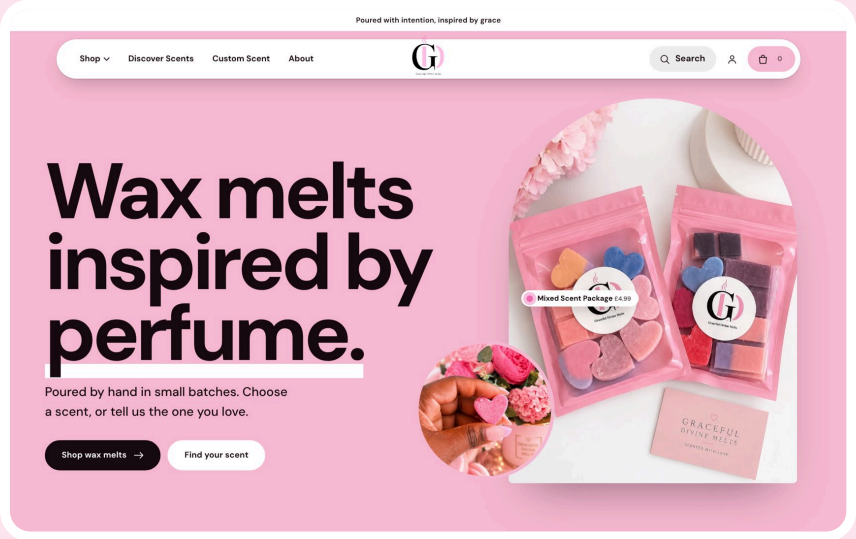

Homepage. Your Instagram and TikTok moving across the page, with a follow button for each underneath.

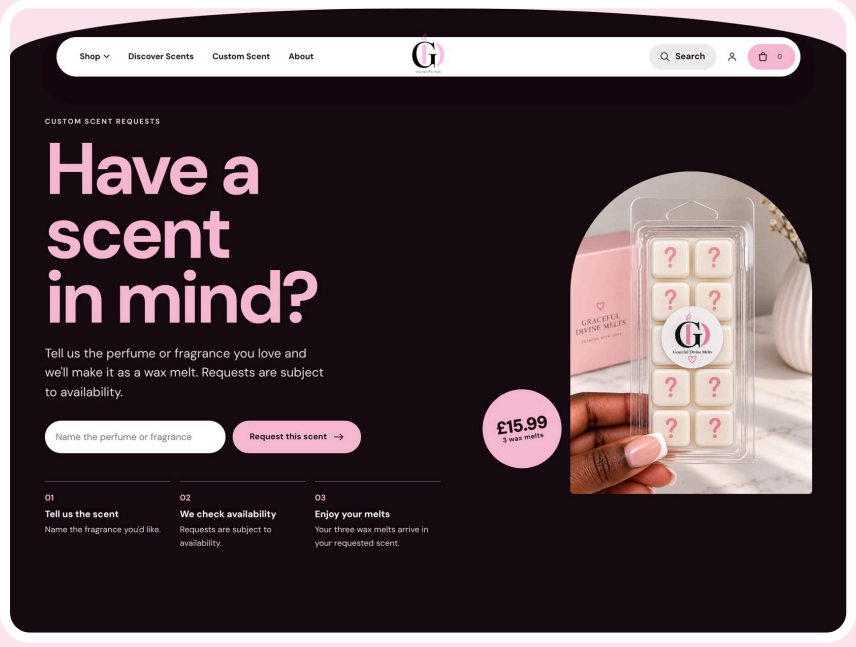

HOMEPAGE

A first impression that sells the scent.

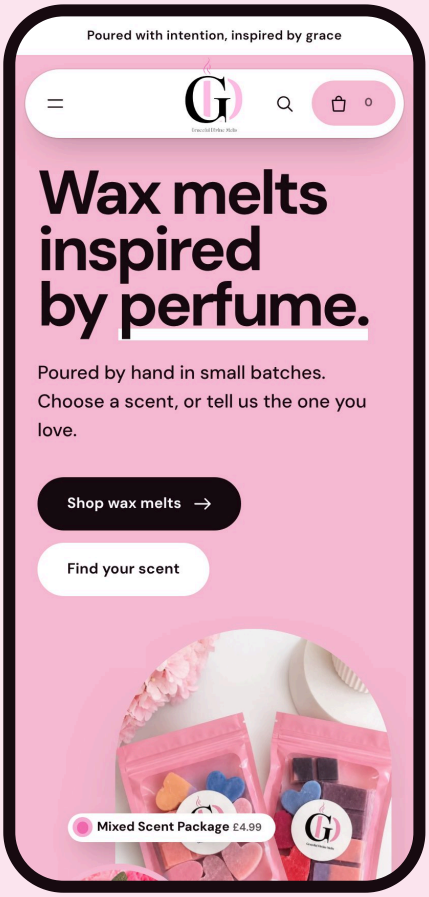

Big, soft and confident. Customers see your best-seller, then pick a scent, discover by mood, request their own and meet the story behind the brand.

Hero. Your headline, two clear buttons and the product everyone should see first.

Custom scent requests. Customers name the perfume they love; it travels with their order.

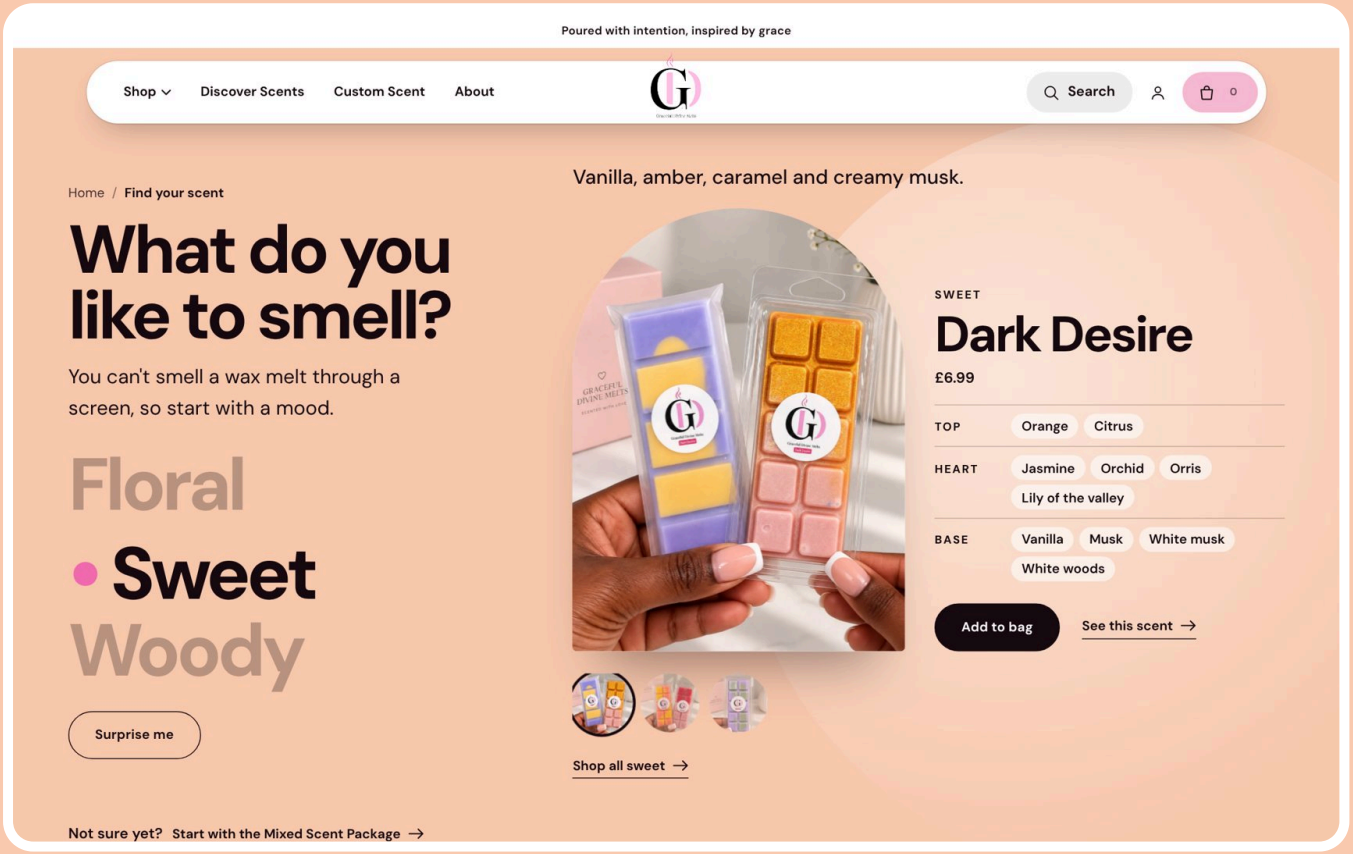

On a phone. Designed phone-first, since most customers will visit that way.

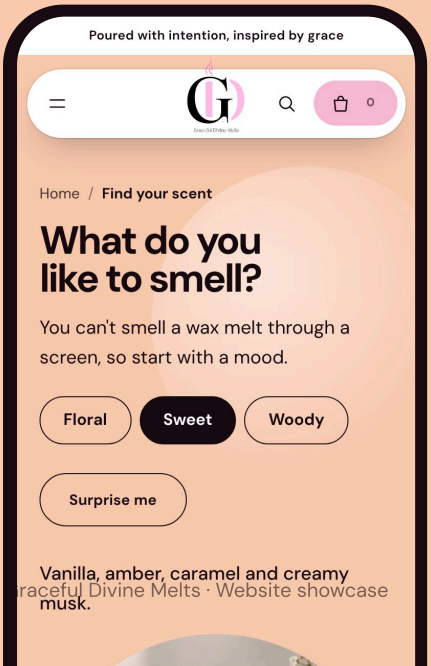

FIND YOUR SCENT

Choose a mood. The whole screen changes.

A guided, full-screen experience. Pick Floral, Sweet or Woody and the page shifts colour, then shows the real scents in that mood with their top, heart and base notes. One tap adds to bag, and "Surprise me" picks one at random.

Desktop. Big mood words on the left, a large framed scent on the right with its notes.

Real information

Scents and notes come straight from your Shopify products, so the page stays correct when you add or change a scent.

Easy to edit

Moods, colours and wording are all editable in the Shopify theme editor.

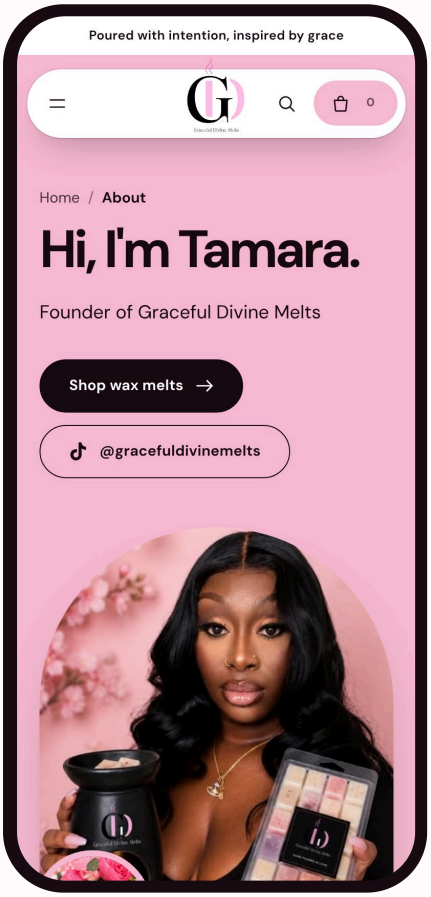

Add to bag from the page

Customers can add a scent without leaving the experience.

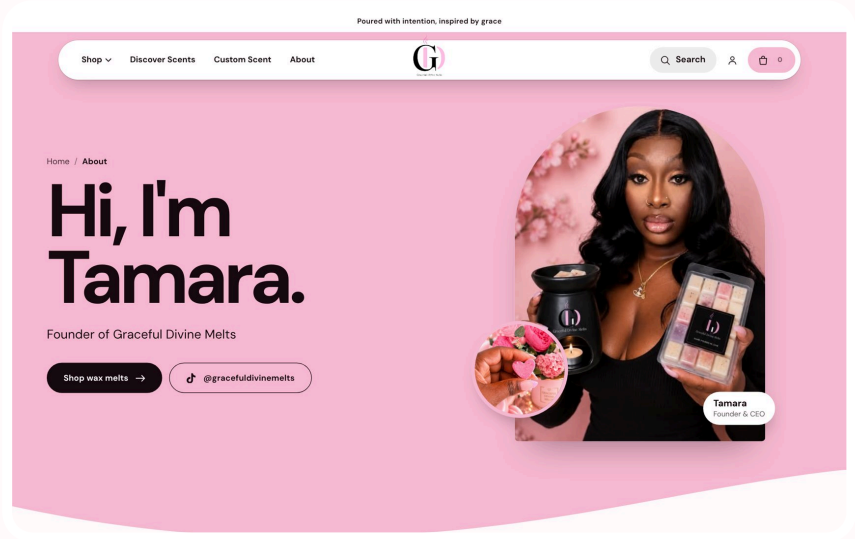

YOUR STORY

A face and a voice customers can trust.

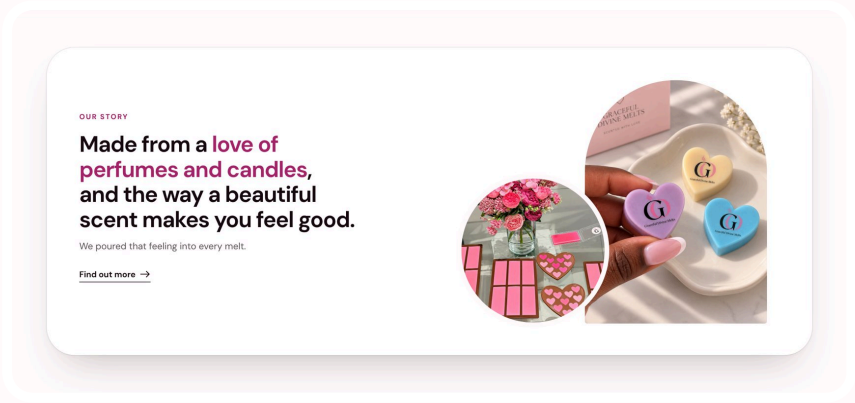

A founder page introducing Tamara in her own words, and a short "Our story" card on the homepage that leads there.

About page on a phone.

About page. Portrait, her words, three promises and a mosaic of the work.

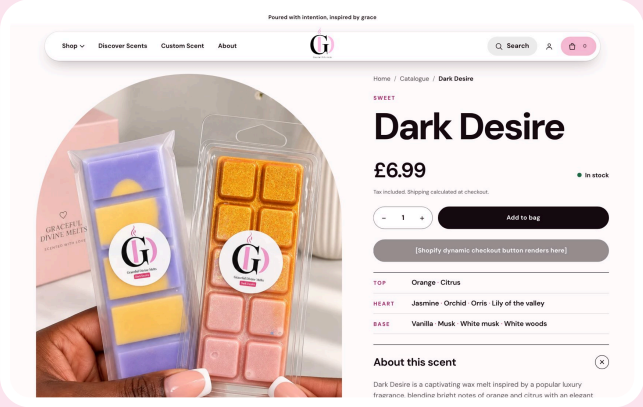

Our story. A floating card on the homepage with a short line and a link to find out more.

The portrait and social pictures shown here are stand-ins taken from your public pages. They are swapped for your chosen originals at launch.

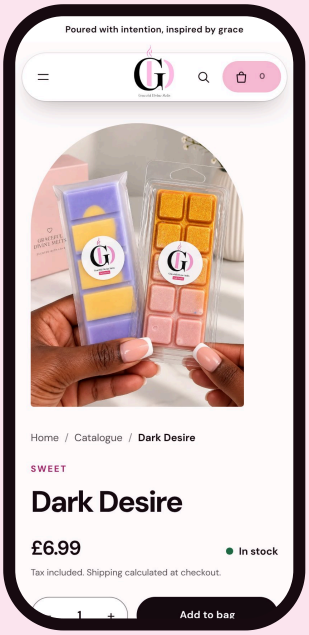

SHOPPING

From browsing to bag, without friction.

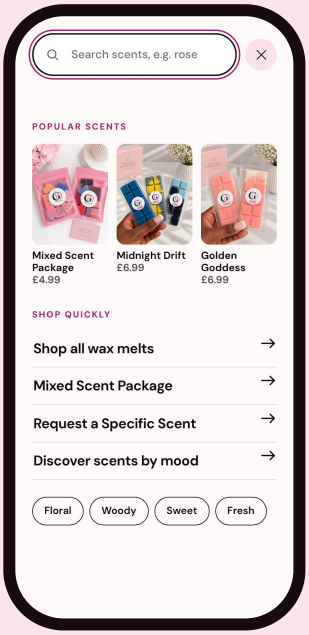

Clear product pages, scent notes, a sticky add-to-bag bar on phones, filters by scent family and a search that suggests as you type.

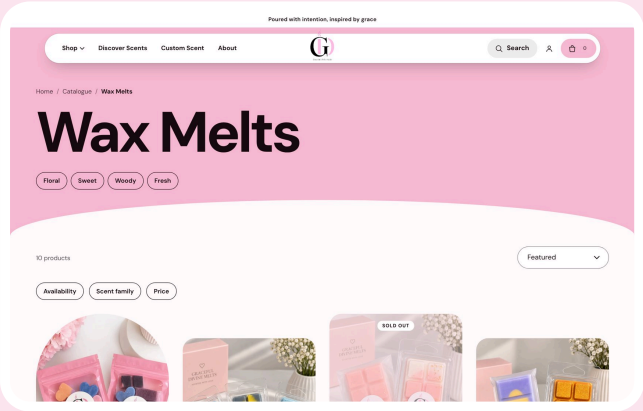

Product page. Large photo, price, stock, quantity and scent notes.

Product, phone.

Search. Popular scents first, shortcuts below.

Collection. Filter by scent family, sort and quick add.

WHAT THE £380 INCLUDES

Everything you can see, and the work behind it.

PART	WHAT YOU GET
Custom design	A website designed for your brand, not a template: your logo, colours, photos and words, built as a native Shopify theme.
Homepage	Hero, scent rail, Discover by mood, custom scent request, bundle deal, Our story, Instagram and TikTok row, FAQ and review links.
Find your scent	The guided full-screen scent experience with notes, add to bag and "Surprise me".
About page	Founder page with Tamara's own words and a photo mosaic.
Shop pages	Product pages, bundle pair-chooser, collections with filters, bag, full-screen search.
Legal and help	Styled policy pages, Delivery & returns, Care & safety, FAQ and Contact, with breadcrumbs.
Header and footer	Floating navigation, rolling announcement bar, all social links and your payment methods.
Research and planning	A full review of your current store, a brand and content inventory, and a search-visibility plan with a Google checklist.
Testing	Automated browser tests, checks at six screen sizes, keyboard and screen-reader friendliness.
Transfer and launch	Installed on your existing Shopify as a safe copy, connected to your products, checked, then switched on. Your old theme stays as a safety net.
Guidance	A plain-English guide to editing text, images and sections yourself.

WEBSITE, ONE-OFF

£380

Everything above, transferred into your existing Shopify store.

AFTER LAUNCH

No plan

No monthly fee. If you want changes later, get in touch and we will quote for them.

Not included: your Shopify subscription, domain and payment fees; new photography or copywriting; email marketing, advertising or ongoing SEO work; third-party apps (none are needed to launch).

GOING LIVE

A safe move into your existing Shopify.

1. **Install as a copy**
   The new design is added to your store unpublished, so your live shop is never disturbed.
2. **Connect your content**
   Your products, collections, menus, policies and social links are linked in. Nothing is re-entered by hand.
3. **Add the scent details**
   The extra product details the new design uses (scent family and notes) are set up so every scent shows real information.
4. **Check together**
   We review the copy on phone and desktop with you and fix anything you spot.
5. **Switch it on**
   One click makes it live. Your previous theme stays in your account in case you ever want to go back.

What we need from you

- Shopify access for us (staff or collaborator account).
- Your chosen portrait for the About page, and the Instagram and TikTok pictures you want shown.
- Final wording for any policy pages that are still placeholders.
- Your confirmed contact email, phone number and opening hours.
